Subject: Proofs of Yrtph 1687

Dear Author:

The proof of your article, to be published in *Regulatory Toxicology and Pharmacology*, is attached as a PDF file. You will also find a Query Form detailing any questions we have regarding your manuscript. For helpful information on PDF files, please see the end of this document.

If, after reading this message, you would still prefer to receive your proofs by fax or mail, please inform us immediately by replying to this e-mail with delivery details.

This PDF file has been produced automatically from an electronic database format; the original file is maintained by Elsevier. Please note that certain details of page layout may still need to be amended before printing. However, the final printed product will conform to our usual high standards for page layout and image resolution.

The only proofreading your article will receive is yours. Therefore it is essential that you read the accompanying PDF proofs carefully. Please use this proof for checking the typesetting and editing, as well as the completeness and correctness of the text, tables, and figures. However, corrections should be kept to a minimum. Excessive alterations and revisions may result in costs that will be charged to you and may delay publication of the article to a later issue. Also, make sure that you answer any questions that have arisen during the preparation of your proof.

Elsevier will do everything possible to have your article corrected and published as quickly and as accurately as possible. Therefore, it is important that you send all of your corrections back to us in one communication. Subsequent corrections will not be possible, so please ensure that your first sending is complete.

If you submitted usable color figures with your article, they will appear in color on the Web?at no charge?and you will find PDF copies of your color figures in the attached file. Please note that the PDF is a low-resolution file. The final product will include a high-resolution file. In the printed issue, color reproduction depends on journal policy and whether you agreed to bear any costs.

List the corrections (including replies to the Query Form) in an e-mail and return to Elsevier using the "reply" button. If, for any reason, this is not possible, mark the corrections and any other comments (including replies to the Query Form) on a printout of the PDF file and fax these pages to +1 (619) 699-6859 or mail to the address given below. Often, revised original art may need to be sent via express mail.

Please **do not attempt** to edit the PDF file, including adding ((post-it)) type notes.

Please respond within **2 business days** (even if you have no corrections), indicating the journal name and article number on all correspondence.

You should have already received a Transfer of Copyright Agreement. If you have not already done so, please return the completed and signed original of the Copyright Transfer by mail or fax or send a scanned copy of the signed original by e-mail.

To receive your gratis offprints, please confirm your mailing address and return the completed form to the address shown below. If you would like to order additional offprints, indicate the required number on the enclosed offprint order form. Note that the author and title lines must be filled in completely. **All offprint orders require prepayment.** Valid forms of prepayment include *check, money order, valid credit card (MasterCard, Visa, American Express), or a purchase order (not a requisition) from an academic institution or a government agency.* Your institute's purchase order must accompany our offprint order form and must be received **BEFORE** we order the offprints.

Finally, we thank you in anticipation of your prompt cooperation and for choosing this journal as your publishing medium.

Kind regards,

Issue Management

Notes:

1. PDF (portable document format) files are self-contained documents for viewing on screen and for printing. They contain all appropriate formatting and all fonts, so that the correct result will be shown on screen and on the printout from your local printer.

To view and print your article you will need Acrobat Reader from Adobe. This program is freely available and can be downloaded from <http://www.adobe.com/products/acrobat/readstep.html>.

Please note that this reader is available for a whole series of platforms, including PC, Mac, and Unix.

There are a number of points to take into account.

- Any (gray) halftones (photographs, micrographs, etc.) are best viewed on screen, for which they are optimized, and your local printer may not be able to output the grays correctly.
- If you are unable to see any color artwork, please check that the *Display large images* tickbox

1/12/2004

PM3006878478

under *File* → *Preferences* → *General...* is ticked. If you are still unable to view your artwork correctly, please contact us immediately.

- If the PDF file contains color images and if you do have a local color printer available, you may not be able to correctly reproduce the colors on it, as local variations can occur.
- If you print the attached PDF file and notice some nonstandard output, please check whether the problem is also present on screen. If the correct printer driver for your printer is not installed on your PC, the printed output will be distorted.

2. Information on the status of your article can be found via Elsevier's Author Gateway (<http://authors.elsevier.com>). For access you will need to provide your surname and our reference code (journal acronym and article number: see the "Subject line" to this e-mail).
